# Introduction

---

The **Engineering, Procurement and Construction (EPC)** contractors have a phenomenal responsibility when it comes to executing a project for the clients. In general, the contractors have to comprehensively undertake a 360 degree approach which includes designing and planning and ensure that the project is delivered accurately and which satisfies the interim specification as laid out by the client.

The objectives of going through the commissioning, operation & maintenance process has been to ensure that quality in the project is never compromised and is being delivered by a design engineer who has the capability and expertise to carry out a detailed engineering plan and design the project. The engineer would also procure all the necessary equipment and materials necessary in order to deliver the project which dramatically benefits the client in the long run.

In this transition, **“Mecwel Group has become a specialist service provider which offers its customers a comprehensive range of products and services for power generation, steel, sugar, oil & gas and refineries and tailor-made solutions to meet specific needs”**.

Mecwel Group is proud to have 30 years of experience and proven track record of world wide execution of projects concerned with EPC and operation and maintenance.

# About Us

---

Mecwel Group is a conglomerate company which takes pride in providing a full range engineering services to customers such as procurement, construction and project management expertise. The legacy of the group is very well witnessed with a talent pool of professionals who work together as one collaborative work-force who understands the customer and their specific prerequisite.

Over the years, we have demonstrated our abilities and strengths in meeting up the expectations of the customers and the budget plans. The company is quite proactive in terms of handling the mission-critical services under the most difficult circumstances.

## The Pivotal Asset

---

- ❖ The company nurtures a talent pool of experts who conceive, design, build and sustain multiple projects.
- ❖ We have a rich philosophy of believing that our experts who tend to work with us are the assets.
- ❖ As Mecwel Group works with clients spread all over the globe and the project location spread across, our experts have the flexibility to travel across and show expertise in handling the toughest projects that get their way.

# Promoter

---

## Mr. Prasada Rao. P

---

Mr. Prasada Rao is the CEO and Managing Director of Mecwel Group, an ISO 9001 company with a strong and dedicated technical team and is responsible for providing strategic guidance to the organization. He is an erudite engineering professional who has inherent capability to show leadership qualities, execution and administrative capabilities with four decades of extensive experience and expertise.

Prior to taking up the management position at Mecwel, he has been serving for two decades at Bharat Heavy Electricals Limited (BHEL), where he participated and involved in the designing, testing, manufacturing, commissioning and servicing of a spectrum of products which later became the core elements to enhance economy.

He has also been on the distinction to work with international agencies like **Alstom, Siemens, Tata Power, Skoda Power** etc with prestigious assignments.

# Core Values

---

## ***Integrity, Trust & Openness***

---

Integrity, Trust & Openness is not just another word, it's part of our organizational heritage and philosophy which we have been diligently following with a rich legacy for 30 years. The organization works and delivers value which is much beyond the contract being agreed with our customers.
