

# Solar Power

Solar Power is one of the power resources which have become the most recent trend and in a nutshell it is the conversion of energy directly from the sunlight into electricity through the usage of photovoltaic's (PV).

The photovoltaic's use certain types of lenses or mirrors and tracking device which stores the power. It goes without mentioning that solar energy often exceeds the energy output as compared to the conventional fossil fuel energy. One can say that, solar system design and its subsequent design have become the benchmarks for many businesses. The solar panel designed by us would guarantee the efficiency up to 15.1, which is the highest that is achieved by any contenders for solar power equipments.

- EPC Projects
- Solar Rooftops For Industries, Commercial, Hospitals, Education Institutions & all other users
- Solar Street Lights
- Solar Power Plants
- Solar Fencing
- Solar Water Heaters
- Solar Water Pumping

# Electrical Works

We have been actively involved in all kinds of electrical works across the landscape; we have been in the electrical works since decades and have been the professionals in the field of electrical design and construction of erection substations measuring upto 132 Kv. Over the decades, we have been the specialist in laying of PCC poles, towers and underground cables.

We excessively work on the erection of transformers and our tangible range of erections has been upto 11Kv and 33 Kv Lines. Added to this, we have been the pioneers in the supply and installations of panel boards & internal cabling.

- Erection substations upto 132kv
- Laying of PCC Poles & Towers
- Laying Underground Cables
- Erection of Transformers
- Erections of 11kv & 33kv lines
- Supply Installation of Panel Boards & Internal Cabling

## About us

Since 2014, Pride Ventures Power & Infrastructure has been serving as one of the leading company in Hyderabad handling the Solar Power Projects, Electrical Works and all types of civil works. With hands-on ownership over these verticals, we have built up an experienced team who are best considered as a group of passionate entrepreneurial spirits in them.

As a premier service provider, you can count on us for the highest levels of quality and service and always ensure that we deliver our services on time and within the stipulated budget range followed by excellent client satisfaction.

We are an "A" Grade Certification from Telangana State Southern Power Distribution Company Limited (TSSPDCL) and empanelled with Ministry of New and Renewable Energy (MNRE) and Telangana State Renewable Energy Corporation Limited (TSREDCO)

## Verticals that we handle

Pride Ventures have a unique legacy in the marketplace towards extensively working on the infrastructure and civil projects. We are always delighted and applauded by our customers in terms of offering premium service in the sectors of Solar Power, Electrical Civil works and we have taken our pride in setting up benchmarks in implementing them.

## Vission And Mission

Pride Ventures has been a one-stop destination for customers and stakeholders; we bring about constant innovation, excellence and integrity which is an amalgamation of the latest technology, human intelligence.

We have been reputed as a most trusted engineering procurement company which has delivered value added services and continue to pioneer for solar power, electrical works and civic works to the delight of the customers across the landscape.

We take our pride in commissioning the best of installations to the clients and thereby executing our projects in a professional manner.

We have the finest capability coupled with both expertise and experience in handling any projects irrespective of its volume and bring about a grand success and value for money.

QUALITY IS OUR  
RESPONSIBILITY

# Civil Works

Pride Ventures have been into civil works since inception and have been quite successful in terms of building different types of construction and residential places, foundations, buildings, water tanks etc and in this endeavour we have been receiving accolades onto developing CC roads.

Apart from that we are quite reputed and at the same instrumental in laying the vacuum dewatering flooring or the VDF for the construction of factory, cellar parking, concrete roads etc. Our other works includes laying of compound walls and laying tiles & granites. As a venture's limited and required scope, we at times involve and extensively work on the construction and earth moving and we also end up in the subsequent equipment supply.

- Construction of Commercial & Residential Places
- CC Roads
- VDF Flooring
- Compound Walls
- Laying Tiles & Granites
