# INTO BUILDING CONSTRUCTION

Let's build your dream Building

# QUALITY ASSURANCE DURING THE COMMISSIONING

We carry out multiple jobs with reference to the earth moving works, and this has propelled us to become the preferred earth moving vendors for customers and the preference is more towards the quality, speed, economic and safety in perspective. Assigned task would be completed by our team well-before the actual deadline.

*(Since the inception and formative years of 2012, we have been quite preferred by our customers for our comprehensive and contemporary ideas that we keep executing and commissioning. The workforce has been delivering services which are coupled with ethics and values and for which we stand unique in the marketplace as compared to other contemporaries.)*

We have been known in the market provide customer driven excellence which of course comes with both agility and system perspective. We have always been taking the privilege of addressing the customer centric concerns which indeed becomes the objective & purpose of the business. We believe in total customer satisfaction by strictly adhering to standard construction practices and maintaining employer's vendor relationships.

## SERVICES

We offer services mostly in the Infrastructure works & deal with plethora of deliverables which includes:

- **Construction & Earthmoving Machinery & Equipment on quantity basis**

**GCR**

## **INFRASTRUCTURES**

GCR Infrastructures, has been the principal contractor and has equally remained as one of the elite infrastructure. We have been instrumental in executing the mass earthwork, control blasting, back filling, demolition work & infrastructure development alongside the roads, drains, utility pipeline etc. We have also been able to get our hands-on over some of the prestigious projects from across Telangana.

As a part of our contracting services, we have been able to extend our hands with reference to deployment of some of the heavy Earth Movers, Rock Breakers, Compactors, Rollers and other machineries for the timely completion of the project which is assigned to us. During the process of commissioning, we are absolutely committed to meet the expectation of our customers through a well-defined & designed service delivery system.

## **WHY?**

With years of experience and expertise, we have been putting our entire efforts to maximize the revenue during the project commissioning and preference is given to reduce the basic cost with the deployment of the latest fleet of machinery which of course comes with a blend of both the scientific and innovative technologies.

# THE ATTRIBUTES

## that we make us unique

### **The construction site becomes ready for next course of action:**

The earth excavation in general includes activities such as the removal of the surface layer debris and further make the site suitable for construction of buildings, apartments and the vast array of gated communities. Our work generally involves the digging, levelling the surface and if possible other excavation work when on demand.

### **The professionals are one of the best excavation contractors:**

One of the best attributable components of our work involves the presence of professionals who have also been the best excavation contractors and these contractors follow all the safety norms and ensure that these norms are followed all the time, during the excavation work. Our work mostly makes the customer feel happy and completely satisfied all the time.

### **The company strives hard to meet the demands of the client:**

As a service company, we always ensure that we work towards meeting the demands of the client. In the process of our delivery we also take valuable feedback of both our staff and the existing clients. We tend to streamline the process after every positive commendation.

### **The best team who deliver the best services in the consumer market:**

We have a selected team of earth moving professionals who are specifically hand-picked by the management who have the necessary experience & expertise to provide best services in the earth moving activities and these professionals have been quite adept to carry out works with highly advanced and modern tools to commission the work.

# OUR OBJECTIVES

As a modus operandi of our objectives, we are always clear on our path of the objectives and remain focused towards the mission and vision of the company which were engraved during the very inception of the formative years:

We look upon the following tenets:

- ✓ We always increase our revenue and earnings year-on-year.
- ✓ The deliverables we have are with high product quality.
- ✓ We always bring about efficient client satisfaction all the time.
- ✓ As a preamble we bring about a positive reputation with our staff and our clients.
- ✓ We have been vehemently focusing on increasing the productivity and its efficient enhancements
- ✓ We absolutely follow and respect the pertinent laws and regulations of the land.

Create with  
the heart;  
**build with**  
the mind.

## WHY ??

As a client, you can get ensured to have the best of services with GCR Infrastructures as we possess the following qualities:

We comply with the existing government laws, rules & regulations all the time.

We absolutely show considerable safety and equally the welfare of everyone associated with the project & constantly strive towards protecting the natural environments.

We always manage the business according to the guiding principles and strive to follow them all the time.

# OUR APPROACH

## The Proactive Approach that we inscribe...

Since the inception, we have become quite capable and proactive in meeting the challenges being faced during the project execution with earthmoving works. During the actual commissioning of the project, our expert team tends to establish & equally maintain the appropriate programs and plans towards safe execution of projects, and become absolutely prompt when there is any environmental damage which has resulted during the project execution.

We are always equipped with all the safety material and equipment such as:

- ✓ Safety mirrors
- ✓ Automatic sprinklers
- ✓ Safety shoes
- ✓ Hand gloves
- ✓ Coveralls
- ✓ Hard hat
- ✓ Safety goggles
- ✓ Safety belts

# OUR COMPANY

Infrastructure is the foundation of growth and economic development and one has seen the demand for modern infrastructures and the testimony of the exponential growth in the last few years. Today' s earth moving works have become a complete precedent towards earth excavations, laying the foundations, grading soil, removing the dirt and rocks, digging trenches, and demolition works to mention a few.

The infrastructural projects have brought in some of the complex machines which specifically operated by professionals and in this regard the various types of earth-moving machines have come into practice and become handy tools for accomplishing different types of tasks at hand. These machines have also brought a complete renaissance to the technological advancements that have taken place in the industry.
